PREFACE.

WE have much pleasure in placing before you a copy of our New Illustrated Catalogue, to the compilation of which we have devoted considerable time and expense in the hope that it will be of service to our constituents, and afford them increased facilities in the selection of their requirements, and feel sure that after you have perused it you will admit that it is the most comprehensive Catalogue of its kind ever shown in the Commonwealth.

We have endeavoured to make it as complete as possible, but should you require any lines which you find are not illustrated in the Catalogue we would ask you to send your enquiry to us, as new lines are continually being added to our stock.

Throughout our warehouse we show an enormous variety of goods, and in lines such as Toys, Fancy Glass and China, and General Fancy Goods of every description, each Season brings forth an endless number of novelties well selected by our home buyers from the leading English, American, and Continental Manufacturers, and we have no hesitation whatever in asserting that in the above-mentioned lines our stock is by far the largest and best assorted of any house in the Colonies.

We have many Special Lines entirely reserved to ourselves, and Customers will find it to their benefit to stock same.

Our Representatives will, as heretofore, visit our Customers with Samples of the latest novelties, but having such a large and varied stock we shall heartily welcome a personal visit to our warehouse, which we are sure would prove mutually beneficial, as it is absolutely impossible for any Traveller to carry samples of every line.

We venture to hope that with the assistance of this Catalogue it will not always be necessary, if in need of goods, to await the arrival of our Travellers, especially with regular lines, for we feel assured that all our Customers know from experience that they can confidently rely upon any orders which are entrusted to us receiving our personal supervision.

We ask our numerous Clients to be sure and send us their forwarding instructions when transmitting us any of their valued orders, failing which we shall naturally enough forward in the cheapest manner.

Owing to the constant fluctuations in the prices of goods we have deemed it advisable not to append prices. We shall, however, be glad to quote for any line upon application, and should goods be left for our selection Customers may depend upon our consulting their interests by sending the latest and most suitable lines, and charging them the lowest possible prices.

In the first few pages of the Catalogue will be found Discount Tables, Ready Reckoner, Tables of Weights and Measures, Rates of Postage, and complete Postal and Telegraphic information, which we feel sure will be of considerable use to our Constituents.

We avail ourselves of this opportunity to sincerely thank you for your past generous patronage, and trusting that our efforts will, as formerly, be rewarded by the liberal and continued orders of our Customers which shall always receive our careful and prompt attention.

We are, Yours faithfully,

FELDHEIM, GOTTHELF & Co.

KEYSTONE-ELGIN WATCHES

which are now in demand in all watch markets in the world by reason of their superiority in accuracy, durability and beauty. The merit of the Elgin Watches has created the largest watchmaking industry on the globe, representing an investment of \$1,000,000 in machinery, and producing in fifty years a total of over 11,000,000 Watches.

Keystone-Elgin Watches are made in five sizes and many grades; and each is the best in its grade, whatever the grade. The highest skill in watchmaking is concentrated in every one of them, making the reputation of this best line of Watches.

THE continued popularity of the celebrated **FORM WATCHES** throughout the Australian Colonies has induced the manufacturers to make them in an **Extra Special Quality**, in best English-made Gold Filled Cases, the latter being guaranteed for 10 years.

The finish and timekeeping qualities of these Watches are unequalled, combining as they do all the good points of the ordinary Form Watches mentioned on page 5 of this Catalogue, with the addition of their being made in a thinner model, and having ten Jewels.

We feel sure that these watches will compare favourably with any other similar watches which are on the market.

Their two best points are, that they are **HIGH IN QUALITY** and **MODERATE IN PRICE**.

Non-Magnetic Watch, "THE FORM."

"THE FORM" PATENT KEYLESS LEVER

Low price. The simplicity and superiority of the movement account for its unusual **GOING AND TIME-KEEPING QUALITIES**, which are **GUARANTEED**. Every Watch is examined and tested before leaving the factory, and therefore does not require any further attention before sale, but is ready for use.

Every part of the movement is **INTERCHANGEABLE**. Spare parts can be obtained in any quantity, and are warranted to fit, making repairs when necessary, easy and inexpensive. **Maladjustment can be replaced without difficulty in a few minutes if broken, the Barrel being quite independent.**

The Watch is **ABSOLUTELY NON-MAGNETIC**, making it **SPECIALLY INDISPENSIBLE** to all connected with the **ELECTRIC and ENGINEERING Trades** as well as the Public generally, as electric currents and appliances are now to be met practically everywhere, and may affect an ordinary watch even at a distance.

The special alloys of which the Balance and Hair Spring of this Watch are made are of the same as the **ALMOST INSENSIBLE TO THE VARIATIONS OF TEMPERATURE**. This valuable quality renders the Watch suitable for all climates, and recommends it most particularly for the Australian Colonies.

No. 10. "The Form." Open face, keyless, leather case.

Recent improvements have enabled us to make the Watch **THINNER and NEATER** in design, and its appearance will now be found equal to the most expensive articles.

The great and exclusive points in all other watches are combined and improved in **"THE FORM."**

"Iona" Patent Collar Stud.

ABSOLUTELY the BEST and Cheapest in the market.

Thousands of tons of studs have already been sold, and the constant repetition of the name is a good receipt for their superior quality.

They are inexpensive, real and well finished, as much care being taken in their manufacture as in the best made studs of the value.

THEY are the most satisfactory and are warranted to give every satisfaction, and we can confidently assert that they have not been so widely and so effectively advertised as the "Iona" Stud.

They are made in different styles, and the undersigned have much pleasure in announcing that they have been appointed Sole Agents for Australia.

A large stock of "Iona" Patent Studs is on hand, and we are prepared to supply our customers should place their orders early and thus avoid disappointment.

Handsome Bent Glass Show Case.

Containing 3 Dozen "IONA" Patent Collar Studs. Assorted 14 different patterns in a case.

"The MASTA" PATENT PIPE.

ABSOLUTELY THE BEST SMOKING PIPE IN EXISTENCE.

Can be had in the Shapes illustrated on these two Pages.

MADE IN THREE GRADES.

To Purchasers of "THE MASTA."

Before selecting please read the following, which explains the difference in the various grades of "THE MASTA" Pipe shown here.

There are three grades, A, B, and C, each of them being marked with a silver band, and Grade A with a gold band. The bowls of the Grade C, being the first picking of the briar, will be found to be the most perfectly smoked wood it is possible to get.

EVERY PIPE GUARANTEED

MANUFACTURED BY—

"THE MASTA" PATENT PIPE CO., LONDON.

The Construction and Principle of "THE MASTA."

The principle on which "The Masta" is made is simplicity itself. The pipe is so constructed that any moisture produced when smoking, instead of being the mouth or flow into the tobacco in the bowl, is so arranged by the stem sets as a direct channel to carry the moisture outwards into the air, so that the smoke, but this cannot happen with "The Masta," as the patent principle renders this impossible. The action of the pipe shown here will easily explain it.

The simple way in which the pipe is constructed will also be seen at once. There are no parts to get out of order, and the pipe is so easily cleaned. The two chambers above and below the bowl below it receive the smoke, thus preventing any blowing or bending of the smoke.

Being so the absolute prevention of injurious moisture entering the bowl, and the most smoking properties of "The Masta," it has been found that everybody, persons can smoke this pipe with enjoyment who could never before smoke an ordinary pipe. We have one and over again invited smokers to this effect.

Notice that "The Masta" is a perfect boon to smokers, and "dry" smokers, as it is the only pipe which allows a dry, cool, and sweet smoke, while at the time keeping the bowl in favour of the smoker.

After smoking "The Masta" separates the smoke from the bowl of the pipe, and shakes out any moisture there may be, allowing the pipe to cool down before refilling. To get rid of the moisture it is necessary to empty the part, as here described, as a otherwise cannot escape, the interior of the pipe would be soon of time be filled with a mass or too much liquid. Although this is so, however, we draw special attention to it, as there have been smokers who regretted this simple instruction and blame the pipe. The principle on which "The Masta" is constructed demands that this simple rule should be rigidly carried out.

A GOOD BRIAR

Should be of sturdy texture, partially sound, well seasoned, and free from cracks and flaws. As the best pipes can only be made out of the heart of the Briar Root—and as often than only eight or ten out of every hundred pipes are perfect in all respects, it will be understood why it is that a first quality pipe is of unusually high price. Low priced pipes are made from inferior parts of the root, and are rejected here as unfit for smoking. Held up with jenny or sopping that even an expert is liable to be deceived.

"THE MASTA."

Purchasers of "The Masta" Pipes, know they are only pipes every pipe is perfectly sound and free from flaws, the difference in price, from the lowest grade to the highest quality, being due to the process of selection, having regard to the length of seasoning, good figuring, seasoning of wood, and maturity of the very best specimens, which will also satisfy the most fastidious expert. Apart from the general principle in the construction of "The Masta" Pipe, every bowl will be found equal, if not superior, in value to any pipe at a similar price on the market. Every pipe is guaranteed, and no smoking or having from any fault in the pipe, within a reasonable time, is replaced free of charge.

FELDHEIM, GOTTMELF & Co.

W. Li, S. N. Li, D. Y. Qi / JPS 1152

From the 1980s to the 1990s, the number of people who have been infected with HIV has increased significantly. In 1980, there were only a few hundred cases reported in the United States. By 1990, the number had risen to over 100,000. This increase was due to a combination of factors, including the spread of the virus through sexual contact, blood transfusions, and intravenous drug use. The discovery of the virus in 1981 and the subsequent development of tests to detect it allowed for more accurate diagnosis and monitoring of the disease. However, the lack of effective treatments at the time meant that many people who were infected with HIV died within a few years. It was not until the late 1980s and early 1990s that effective antiretroviral drugs were developed, which have since become the standard treatment for HIV. These drugs have significantly reduced the mortality rate associated with the virus, but they do not cure the disease. As a result, the number of people living with HIV has continued to rise, and the disease has become a major public health concern. In 1995, the Centers for Disease Control and Prevention (CDC) estimated that there were over 300,000 people living with HIV in the United States. This number has continued to rise, and in 2000, it was estimated that there were over 400,000 people living with HIV in the United States. The CDC also estimates that there are over 10 million people living with HIV worldwide. The impact of HIV on public health has been significant, and it remains a major concern for health care providers and the general public. The development of a vaccine for HIV would be a major breakthrough in the fight against the disease, and it is the hope of many researchers that such a vaccine will be developed in the near future.

TOBACCO EXPERTS' OPINION

HERB JOHANN, ESQ. Our Great Tobacco Expert says

*Tobacco grown in certain Districts in EAST INDIES is sold as
produce at a price of 10 Marks per 100 lbs; no more or less. But the price of the
leaf I have never known go outside of more than 10 Marks per 100 lbs.

July 30th, 1908

Dear Sir

I am directed by Sir Edmund Barton to acknowledge the receipt of your letter of the 25th inst., and to thank you for the box of your new brand of cigars "Surabharani".

I am to inform you that Sir Edmund Barton has smoked one or two of the cigars, and he thinks their quality is very good indeed, especially considering the very moderate price at which they are sold.

Sir Edmund Barton will be pleased if you will send him a box containing a hundred of the cigars in question.

Yours faithfully,

Ernest E. Flannery
Private Secretary.

During its early history, *Freda* floatings were made up of a mixture of white and cream and were used as a cosmetic, but will maintain their present condition if kept for years. This is the case with the White Floating. Interior floatings are originally different in shades, and after being afloat, turn to a dirty cream and subsequently to a dingy brown, prohibiting their use on monuments of these shades. Therefore, they are not recommended for use on granite.

Doulton's PRINTED "WATTLE" PATTERN

SEMI PORCELAIN DINNER WARE

ONE of the most notable and pleasing of the Period Flairs to be found under the Doulton's Cross is the "Wattle" pattern. It was first introduced by Mr. L. M. Doulton, who spent many months in making sketches of the floral designs of the most famous artists of the time. The "Wattle" pattern, as it is called, is a most graceful and pleasing design, and the Doulton's Cross is a most graceful and pleasing design. The pattern is a most graceful and pleasing design, and the Doulton's Cross is a most graceful and pleasing design.

Manufactured exclusively by
Messrs. DOULTON & Co., Ltd., Burslem, England.

Sole Agents for New South Wales: FELDHIM, GOTTHELF & CO.

HORSE SHOES.

A Few Years Ago

THE BRYDEN HORSE SHOE COMPANY,
OF CATASAUQUA, PENNSYLVANIA, U.S.A.

DESIRING to extend their trade to Australia and New Zealand sent a thoroughly practical farmer to those countries to ascertain the pattern of shoes most in favour. After consulting with hundreds of men expert in that line we settled on the type here illustrated

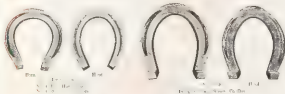

Double Iron Shoe

Single Iron Shoe

which we have called **THE COLONIAL SHOE**. They are made in eight sizes of Double refined Iron. Handsomely Finished, every Shoe exactly alike, Level Foot Surface, Well Punched, and can be furnished Toe-clipped or Plain. These Shoes are kept in Stock by
